

MAKE TRANSIT HAPPEN NOW!

SUPPORT THE NATIONAL PUBLIC TRANSIT STRATEGY

Congestion and unreliable transit in our cities are bad for our environment and our economy. More time spent traveling also means less time spent with the people that matter to you.

Toronto's transit systems are falling behind the world. Yet, Mayor Ford has stopped important transit expansion projects with no money or plan to replace them.

We need stable, reliable funding and support to plan and implement long-term transit solutions.

We can't wait for our cities to fall apart. We must act today to build thriving, sustainable cities for the future.

That's why Olivia Chow and the New Democrats are taking action and proposing legislation for a National Public Transit Strategy. For more info, or to get involved, visit oliviachow.ca.

Dear Members of Parliament,

I believe in investing in our communities. I also believe that our federal government has a responsibility to provide leadership on public transit issues.

Please stand up for the Canadians you represent and support the National Public Transit Strategy Bill.
